Sequence 130, Application US/09050159A

Patent No. 6197505

GENERAL INFORMATION:

APPLICANT: No. 6197505berg, Leif T

APPLICANT: Andersson, Maria K

APPLICANT: Linstrom, Per H

TITLE OF INVENTION: METHODS FOR ASSESSING CARDIOVASCULAR STATILE OF INVENTION: COMPOSITIONS FOR USE THEREOF

CURRENT APPLICATION NUMBER: US/09/050,159A

CURRENT FILING DATE: 1998-03-27

CURRENT FILING DATE: 1998-03-27

CURRENT FILING DATE: 1998-03-27
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        В
                                                        Query Match:
